

The best thing about a  
boolean is even if you are  
wrong, you are only off by a  
bit.

Without requirements or design, programming is the art of adding bugs to an empty text file.

If builders built buildings the way programmers wrote programs, then the first woodpecker that came along would destroy civilization.

A good programmer is  
someone who always looks  
both ways before crossing a  
one-way street.

Always code as if the guy who  
ends up maintaining your  
code will be a violent  
psychopath who knows where  
you live.

Programming is like sex. One  
mistake and you have to  
support it for the rest of your  
life.

If debugging is the process of removing software bugs, then programming must be the process of putting them in.

In order to understand recursion, one must first understand recursion.

Question: Why did the  
multithreaded chicken cross the  
road?

Answer: other to side. To the  
get.

There are 10 kinds of people –  
those who understand binary  
and those who don't.

Software is like cathedrals.  
First we build them, then we  
pray.

There are two ways of constructing a software design. One way is to make it so simple that there are obviously no deficiencies. And the other way is to make it so complicated that there are no obvious deficiencies.

Did you hear about the new  
MegaSuperComputer?  
It returns from an infinite loop  
in just 6 seconds!

I could tell you a UDP joke but  
I don't know if you'd get it.
